

Feasibility Study Update October 2009

Disclosure

This presentation has been prepared by Platinum Group Metals Ltd. ("Platinum Group" or the "Company"). Information included in this presentation regarding the Company's mineral properties has been compiled by R. Michael Jones, P.Eng, the President and Chief Executive Officer of the Company, and a non-independent Qualified Person for purposes of National Instrument 43-101 - Standards of Disclosure for Mineral Projects ("NI 43-101"), based on the independent technical reports, and Press Release Information filed by the Company with the Canadian securities regulators and the U.S. Securities and Exchange Commission ("SEC").

For more detailed information regarding the Company and its mineral properties, you should refer to the Company's independent technical reports and other filings with the Canadian securities regulators and the SEC, which are available at www.sedar.com and www.sec.gov, respectively. Scientific or Technical information contained herein is derived from the Company's technical reports which include more detailed information with respect to the Company's properties, including the dates of such reports and the estimates included therein, details of quality and grade of each resource, details of the key assumptions, methods and parameters used in the resource estimates and the Feasibility Study, a general discussion of the extent to which the resource estimates and the other estimates and projections included in the reports may be materially affected by any known environmental, permitting, legal, taxation, socio-political, marketing, or other relevant issues.

Information included in this presentation, the Company's independent technical reports and the Company's other public statements related to its mineral properties has been prepared in accordance with securities laws in effect in Canada, which differ from U.S. securities laws. The SEC permits U.S. mining companies, in their filings with the SEC, to disclose only those mineral deposits that a company can economically and legally extract or produce. The Company uses certain terms in this presentation, such as "resources," that the SEC's guidelines strictly prohibit U.S. registered companies from including in their filings with the SEC. You are urged to consider closely the disclosure in our Form 40-F annual report, which may be secured from us, or from the SEC's website at www.sec.gov.

This presentation also contains information about adjacent properties on which the Company has no right to explore or mine. The Company advise you that the SEC's mining guidelines strictly prohibit information of this type in documents filed with the SEC. Investors are cautioned that mineral deposits on adjacent properties are not indicative of mineral deposits on our properties.

This presentation is not an offer to sell, or a solicitation to buy, any securities in any jurisdiction. The Toronto Stock Exchange and the American Stock have not reviewed and do not accept responsibility for the accuracy or adequacy of this presentation, which has been prepared by the Company.

Historical results or feasibility models presented herein are not guarantees or expectations of future performance.

Forward Looking Statements

Certain of the statements made herein, including statements regarding the timing of future activities and achievements by the Company, future anticipated exploration and development programs, completion of a Feasibility Study in respect of the Western Bushveld Joint Venture, business plans, potential mining scenarios and timing of production, business trends and future operating factors and anticipated platinum supply and deficits are forward-looking and subject to important risk factors and uncertainties, many of which are beyond the Company's ability to control or predict. In addition, resource estimates, the pre-feasibility study and the Feasibility Study results constitute forward-looking statements to the extent that they represent, respectively, estimates of mineralization that may be encountered upon additional exploration and estimates of the capital and operating expenses, metals and currency prices and other operating conditions that may be encountered in the future.

Forward-looking statements are necessarily based on a number of estimates and assumptions that are inherently subject to significant business, economic and competitive uncertainties and contingencies. Known and unknown factors could cause actual results to differ materially from those projected in the forward-looking statements. Such factors include, among others: metals price volatility; demand for platinum and the platinum supply; additional fundraising requirements; defective title to mineral claims or property; discrepancies between actual and estimated reserves and resources, between actual and estimated development and operating costs, between actual and estimated metallurgical recoveries and between estimated and actual production; changes in national and local government legislation (including environmental legislation), taxation, controls, regulations and political or economic developments in Canada, South Africa or other countries in which the Company does or may carry out business in the future; success of exploration activities and permitting time lines; the speculative nature of mineral exploration, development and mining, including the risks of obtaining necessary licenses and permits; dilution; competition; currency fluctuations; and loss of key employees. The Feasibility Study includes plans on surface rights that the company does not own. Failure to acquire these surface rights may materially impact the plans. In addition, there are risks and hazards associated with the business of mineral exploration, development and mining, including environmental hazards, industrial accidents, unusual or unexpected formations, pressures, mine collapses, cave-ins or flooding (and the risk of inadequate insurance or inability to obtain insurance, to cover these risks), as well as the factors described or referred to in the section entitled "Risk Factors" in the Company's Annual Information Form for the year ended August 31, 2007 which is available on SEDAR at www.sedar.com, and is included as part of the Company's Form 40-F annual report filed with the SEC at www.sec.gov. You are advised to review these risk factors, and not to place undue reliance on forward-looking statements.

The Company undertakes no obligation to update publicly or release any revisions to forward-looking statements to reflect events or circumstances after the date of this presentation or to reflect the occurrence of unanticipated events.

One of the best undeveloped Platinum Assets in the world

- WBJV Project 1 is high grade near surface and provides attractive returns
- We are competitive on the key industry factors for supply – safety, labour and power
- Mechanized decline mine development provides for rapid safe, reliable access
- Shallow depth and high grade – less power per ounce

Updated Feasibility Study

October 8, 2009

- Steady state ounces increased to 275,000 per year 4E from 250,000
- Measured and Indicated Mineral Resources increased by 0.924Moz to 8.2Moz 4E
- Reserves increased 7% to 4.67 M ounces 4E

See Disclosure, Forward Statements and Risk Factors

Updated Feasibility Study

October 8, 2009

- 7 g/t resource grade for 10 years
- Revised mine plan calls for production of ore in 2011 and first concentrate sales first quarter of 2013
- Project 3 adds further 1.9M ounces 4E Inferred

Updated Feasibility Study

October 8, 2009

- Peak funding reduced by US\$64m to US\$443m.
- Life of Mine Capital cost estimate, over 22 years reduced by US\$89m to US\$595m
- At a platinum price of US\$1,343 per oz, the Project IRR is 24% pre tax

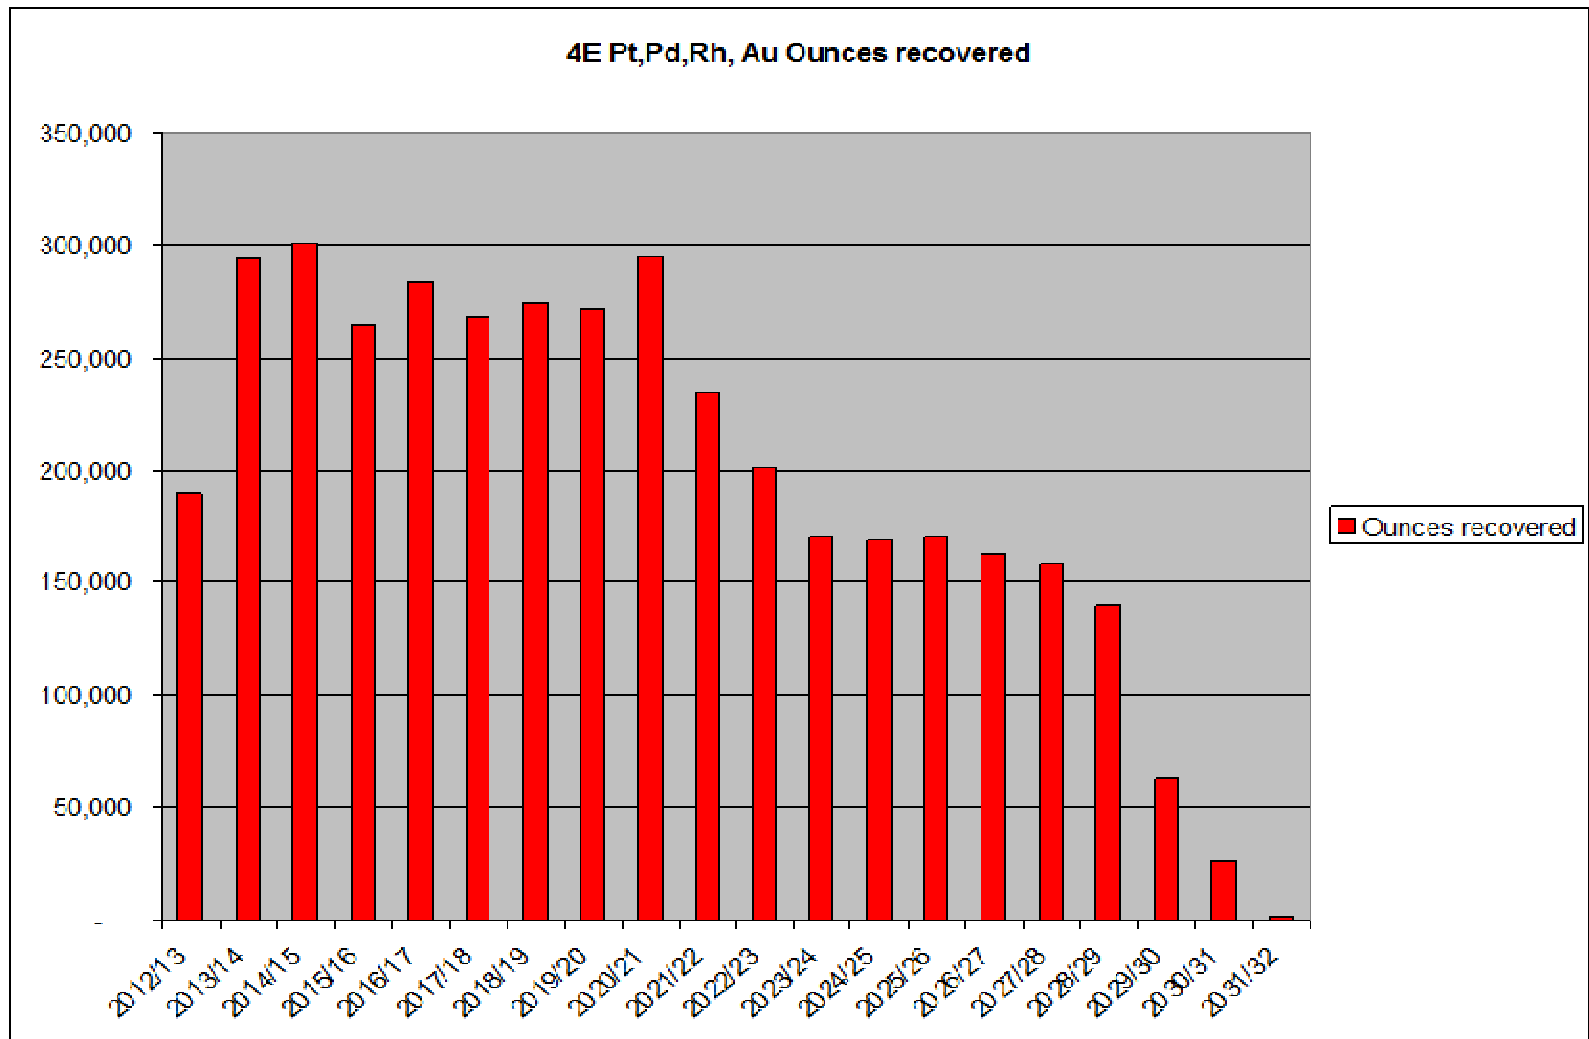

Updated Feasibility Study

October 8, 2009

- Platinum Group's 74% NPV share pre-tax is US\$726m (NPV5), US\$ 352 (NPV10)
- Post tax NPV US\$431m (NPV5) and US\$188m (NPV10)
- Received Minister approval of the majority title transfers for the 74% transaction

Updated Feasibility Study

October 8, 2009

Financial Details - Updated

WORKING COSTS EXCLUDING SMELTER DISCOUNT	US\$/4E oz	R /tonne milled
Cost during ramp up excluding any power generation	\$543	R717
Cost at steady state grid power post 2015	\$521	R491
Life of Mine Average	\$526	R525

Financial Details - Updated

EVALUATION (NPV) ~ <u>Pre-tax</u>		NPV 5% Discount	NPV 10% Discount	NPV 12.5% Discount

Strong Supportive Shareholders

- Geologic Resource Partners LLC (USA)
- JPMorgan Asset Management U.K. Ltd. (UK)
- BAC Platinum Fund (Zurich)
- Gold 2000 (Zurich)
- Julius Baer Gold Fund (Zurich)
- Genesis Investment Management, LLP (UK)
- Franklin Templeton Inc. (USA)
- Chilton Investment Company, LLC (USA)
- R. Michael Jones
- U.S. Global Investors, Inc. (USA)
- Goodman and Co. (Toronto)
- Salida Capital Management (Toronto)
- Canada Pension Plan
- Wexford Capital
- Frank Hallam

Conclusions

- We have three strategic options to consider now – Build it, Partner or Hedge it, or Sell it
- Plan calls for commencement of construction in late 2009 or early 2010.
- We are looking for the best return for shareholders – and all paths are active
- Right Time for Platinum – High Grade and Near surface
